GLOBAL SHARED THREAT INTELLIGENCE

Open Threat Exchange (OTX)

OTX is the world's first truly open threat intelligence community that enables collaborative defence with actionable, community-powered threat data.

J2 CSC has integrated OTX feeds to:

- Strengthen your defences and help others do the same
- Collaborate with other security pros and get access to emerging threats and get access to emerging threat data
- Automatically export Indicators of Compromise into the security tools to improve detection of emerging threats
- Provides Live Threat Feed & Interactive threat Map
- Free Reputation Monitor Alert, to detect if your IP's & Domains are targeted
